

BALANCE WP1

Data management, intercalibration and collation

SGU

Sveriges geologiska undersökning
Geological Survey of Sweden

WHY ?

- A platform for communicating data and metadata, (www portal) between BALANCE partners and end users
- Provide BALANCE with compatible and harmonised data according to agreed standards and formats
- Develop protocols and standards
- Data collection for habitat models

SGU

Sveriges geologiska undersökning
Geological Survey of Sweden

HOW ?

- 12 partners, 7 nations
- Workgroups for harmonisation of data; Biology, Geology, Oceanography, Socio/Economic
- Workgroups on standards and protocols
- SGU, Sweden will host the BALANCE portal
- Data collection for the habitat models will be carried out in 4 pilot areas

SGU

Sveriges geologiska undersökning
Geological Survey of Sweden

WHEN ?

- MS1 Prototype GIS portal, Determination of required data (WP2-4), Data formats, Data inter-calibration, Identification of case study areas
- MS2 Publication of data through portal, Document on standards and protocols, Survey results, Data delivery -> Marine landscapes

SGU

Sveriges geologiska undersökning
Geological Survey of Sweden

WHEN ? continued

- MS 3 Evaluation of GIS portal functionality, Marine landscape published through portal, Report on intercalibration and statistical processing of field data, Data delivery - > WP2 (Habitat maps and models)
- MS 4 BALANCE metadata available and downloadable, Updated standards and protocols document, Report on Marine landscapes, Draft report on WP1 activities
- MS 5 *Final report!*

SGU

Sveriges geologiska undersökning
Geological Survey of Sweden

WHO ?

- Coordinating partner: P16, Geological Survey of Sweden
- Partners: 1,2,3,4,7,8,9,11,12,15,16,20
- Countries: Denmark, Latvia, Estonia, Lithuania, Finland, Sweden, Norway

SGU

Sveriges geologiska undersökning
Geological Survey of Sweden

.... Is going to do the job ?

- P16 (SGU, Sweden) €260000
- P2 (GEUS, Denmark) €178000
- P3 (NERI, Denmark) €167000
- P11,P15 (SYKE, Finland, SNBF Sweden) €70000
- P4 (DIFRES, Denmark) €60000
- P12 (GSF, Finland) €47500
- P9 (CORPI, Lithuania) €44500
- P8 (EMI, Estonia) €43000
- P1 (SNS, Denmark) €25000
- P20 (NGU, Norway) €21900
- P7 (IAE, Latvia) €20000

SGU

Sveriges geologiska undersökning
Geological Survey of Sweden

SGU is going to use the ESRI Portal toolkit for the "BALANCE portal". The toolkit is designed to facilitate communication and sharing of geographic data and resources.

Examples of portals.

Geodata.gov

Geonorge.no

Mareano.no

Arealis.no

SGU

Sveriges geologiska undersökning
Geological Survey of Sweden

- **The "BALANCE portal".will have the following functions:**
- **Search Page**
- **View Metadata**
- You can use the metadata detail and the full metadata view to browse through information to locate what you are looking for.
- **Map Viewer**
- Map data can be viewed in the Map Viewer or with GIS software to display multiple data sources from the "BALANCE portal" along with data from local sources
- **Publish Data:**
- You can provide geographic data by publishing map services and images

- **Metadata**

- Metadata will follow the ESRI implementation of the **ISO 19115** metadata standard

SGU

Sveriges geologiska undersökning
Geological Survey of Sweden

- **You can publish metadata in any of the following ways:**
- 1. Metadata Harvesting: an automated scheduled process of collecting new and updated metadata from your metadata repository.
- ArcIMS metadata service
- Web Accessible Folder (WAF)
- Open Archive Initiative (OAI) metadata service.

SGU

Sveriges geologiska undersökning
Geological Survey of Sweden

- **You can publish metadata in any of the following ways:**
- 2. Online Metadata Creation Form: Complete an online metadata creation form for your web service or geographic content, and the "BALANCE portal" will automatically create the metadata and publish it for you.

SGU

Sveriges geologiska undersökning
Geological Survey of Sweden

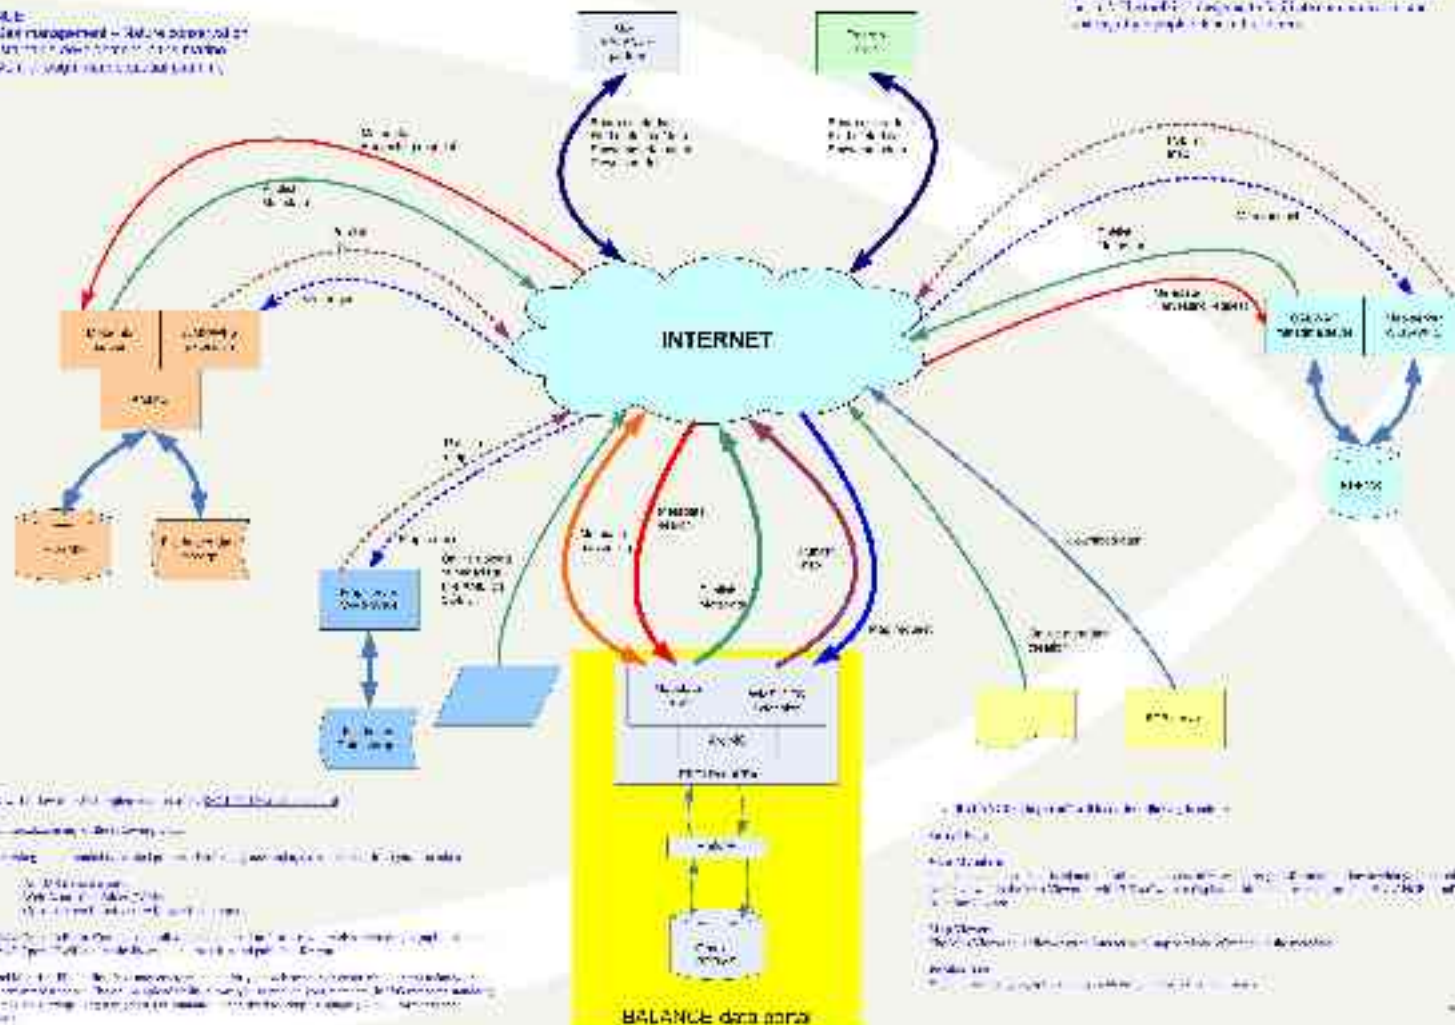

- **You can publish metadata in any of the following ways:**
- 3. Online Upload Metadata File Utility: You may create metadata for your web service or geographic content using your favorite third-party metadata tools. The online upload utility allows you to publish your metadata (in ISO metadata standard) files in text, Extensible Markup Language (XML), or Standard Generalized Markup Language (SGML) format to the "BALANCE portal".

BALANCE WP1 Data Portal

WP1 Data Portal (DTP) - Portal for Data Exchange
www.balancedataportal.eu
www.balancedataportal.eu

BALANCE
Data Site management - Active portal of
data sites for the European Geological
Survey (ESG) project (2008-2011).

Metadata

Metadata is data about data.

Metadata is data about data, it is information about data.

Metadata is

- Data description
- Data location
- Data access

Metadata is data about data, it is information about data. Metadata is data about data, it is information about data.

Metadata is data about data, it is information about data. Metadata is data about data, it is information about data. Metadata is data about data, it is information about data.
